部首筆畫索引

編　法：本索引係按單字之部首編列。其屬同一部首者，再以單字筆畫多寡爲序。單字後註明單字編號。

用　法：檢查時先查出單字所屬之部首，再按其筆畫(除去部首筆畫數)在索引中找出單字，然後根據單字編號，找出書內單字，以及以這一單字爲首所組成的詞語。

RADICAL INDEX

In this index the characters are listed under their respective radicals. Characters with the same radical are arranged in the ascending order according to the number of strokes used in writing them. The figure to the right of each character is its identification number under which the character can be found in the body of the dictionary.

The first step in looking for a character is to find out the radical under which it is listed. The next step is to look for the character in the index according to the number of strokes (i.e. the total number of strokes used in writing the whole character minus the number of strokes used in writing the radical) which is indicated with Chinese numerals in the column to the left of the characters. With the identification number as a guide, one can locate in the dictionary the character and the entries beneath it.

筆畫部首索引

編 法：本索引係按單字筆畫多寡編列。其筆畫相同者再按部首之順序。單字後註明該單字所具字號。

用 法：檢字時先計算單字筆畫，按筆畫在索引中找出單字，再根據單字後註明之字號查出書內單字，以及以這一單字爲首的詞語。

STROKE NUMBER INDEX

In this index the characters are arranged in the ascending order according to the number of strokes used in writing them. Characters with the same number of strokes and under the same radical are grouped together, the radicals being indicated in the column to the left of the characters. The figure to the right of each character is its identification number under which the character can be found in the body of the dictionary.

The first step in looking for a character is to count the number of strokes used in writing it. The next step is to find the character in the index according to its number of strokes. With the identification number as a guide, one can locate in the dictionary the character and the entries beneath it.
